Continuing Education Credits

Applications will be made to the American Board for Transplant Certification (ABTC) for CEPTCs and to the National Association for Healthcare Quality (NAHQ) for CPHQs.

This activity will also be submitted to American Nephrology Nurses Association for approval to award contact hours. American Nephrology Nurses Association — Approver is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Objectives

Following the three-day Transplant Quality Institute course participants will be able to:

- Examine the impact of the 2007 CMS Conditions of Participation for Transplant Programs;
- Describe the strategic priorities of the OPTN/UNOS, and SRTR;
- Identify strategies to ensure the integrity of data submitted to the OPTN;
- Discuss the methodology of the SRTR risk-adjusted graft and patient survival models;
- Demonstrate the use of the UNOS waitlist management tool and the Organ Offer Report (OOT);
- Explain the implications of the renewed focus on waitlist mortality and transplant rate;
- Discuss effective use of graft loss and patient death CUSUMS;
- Explore the use of the organ acceptance CUSUMS;
- Identify proven strategies to effectively manage the waiting list;
- Outline effective approaches to securing physician and hospital buy-in to QAPI;
- Evaluate OPTN policy related to disease transmission and the role of UNOS staff, DTAC, and CDC in this process;
- Describe a “best practice” PHS Increased Risk program as it relates to program development, patient consent, and disease surveillance;
- Explore donor derived malignancy transmission through tracer methodology and adverse event management;
- Examine the philosophy behind the SRTR metrics, the who, what, and why;
- Discuss unique aspects of QAPI for VAD and other device programs;
- Identify strategies to prepare and manage a Joint Commission, UNOS and CMS survey;
- Evaluate unique aspects of QAPI for Living Donor programs and describe strategies to prepare and manage a UNOS and CMS survey;
- Explain the quality components of managed care contracts to gain and maintain COE;
- Examine models to enhance engagement of staff in a team approach to quality improvement;
- Describe approaches to align hospital and transplant center emergency preparedness plans;
- Evaluate the current state of ‘big data’ in healthcare and transplant;
- Describe future directions and implications in quality management;
- Explore the evolution of the quality role in transplant programs;
- Discuss strategies to effectively lead by influence
- Analyze the implications of the updated CMS CoP’s (if released) and how centers are adapting practice to regulation; and
- Compare successful approaches to physician engagement and collaboration in quality improvement.

Who Should Attend?

The scope of this course is focused transplant quality training making it an ideal opportunity for:

- Transplant program leadership with oversight responsibility for quality
- Transplant Physicians and Surgeons with responsibility for quality in transplant
- Transplant Clinical, Data, and Operational Managers
- Transplant Quality Coordinators/Officers
- Transplant Compliance Coordinators/Officers
- Transplant/Hospital Improvement Engineers/Staff
- Transplant/Hospital Educators with responsibility to educate and engage staff in quality
- Hospital Quality/Patient Safety/Risk Management Staff
- Hospital Administrators and Executives responsible for transplant programs
- Transplant Administrators

Accommodations
